APPLICATION FOR PERMIT

TO APPROPRIATE THE PUBLIC WATERS OF THE STATE OF NEVADA

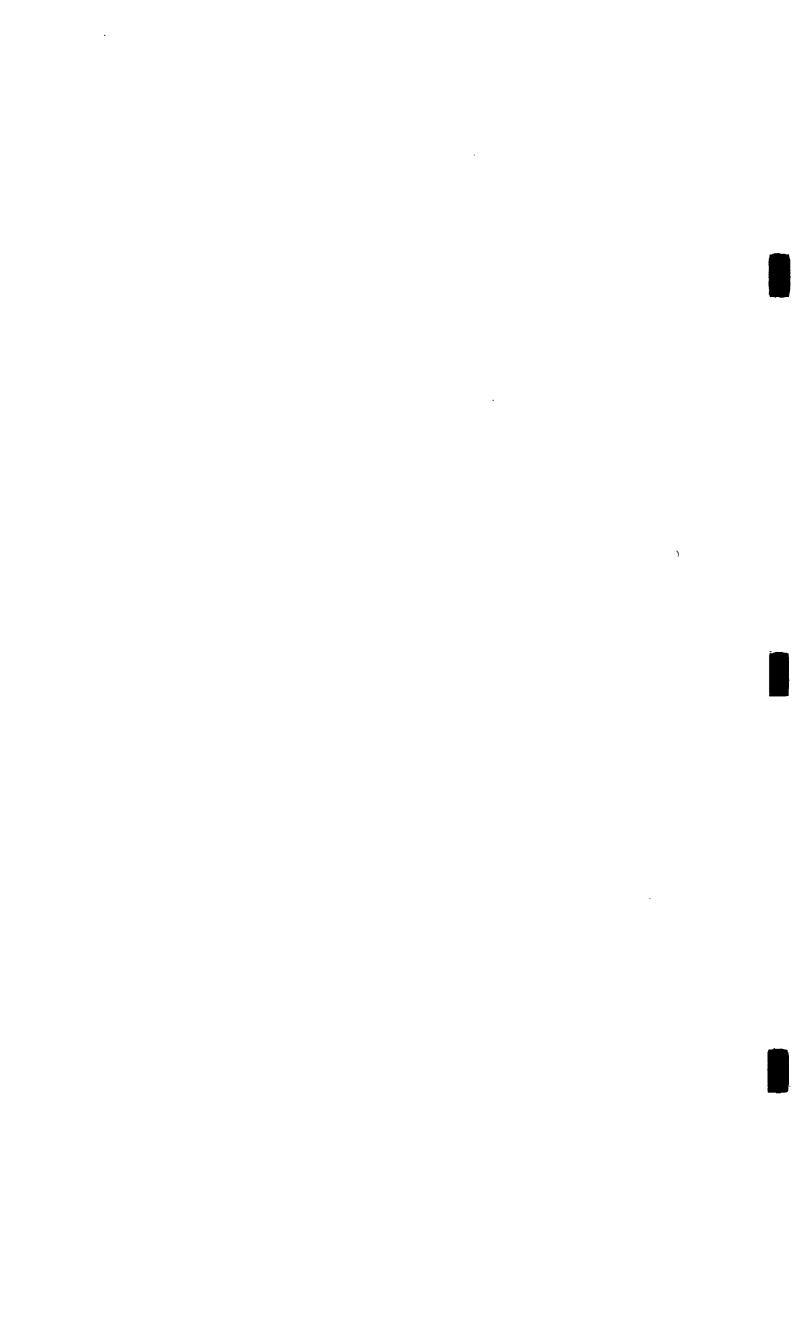

Date of filing in State Engineer's Office JUL 1 7 1980
Returned to applicant for correction.
Corrected application filed
Map filed NOV 1 4 1980
The applicant U.S. Government Ballistic Missile Office AFRCE-MX, Norton Air Force Base of San Bernardino, Street and No. or P.O. Box No. City or Town California 92409 partnership or association, give names of members.) California of the State of Nevada, as hereinafter stated. (If applicant is a corporation, give date and place of incorporation; if a copartnership or association, give names of members.)
The source of the proposed appropriation is underground Name of stream, lake or other source.
2. The amount of water applied for is
3. The water to be used for Quasi-Municipal
Irrigation, power, mining, manufacturing, domestic, or other use. Must limit to one use. 4. If use is for:
(a) Irrigation (state number of acres to be irrigated)
(b) Stockwater (state number and kinds of animals to be watered)
(c) Other use (describe fully under "No. 12. Remarks")
(d) Power:
(1) Horsepower developed
(2) Point of return of water to stream
5. The water is to be diverted from its source at the following point: NW4 NW4 Section 15, T.9N., R.66E
M.D.B.&M. or at a point from which the NW corner of Section 17, T.9N., R.66E.,
M.D.B.&M. bears N.85 ⁰ 19'30" W., 11,170.31 feet.
6. Place of use Lake Valley; includes only federally owned land within the following Describe by legal subdivision, if on unsurveyed land it should be so stated.
townships: See attached sheet
7. Use will begin about January 1 and end about December 31, of each year. Month and Day Month and Day
8. Description of proposed works. (Under the provisions of NRS 535.010 you may be required to submit plans and
specifications of your diversion or storage works.) Diverted through pipes for construction
purposes from a drilled well State manner in which water is to be diverted, whether by dam or other works, whether through pipes, ditches, flumes, or other conduits.

Protests Filed

Protested 2/17/81 by Joseph F. Griggs, Jr., Great Basin MX Alliance

The attached application for the appropriation of ground water is for the purpose of supplying water for the construction and operational phases of the MX Missile System in Lake Valley. The attached application is one of five for appropriation of ground water in the valley. Each application is for 761 acre-feet per year of ground water resulting in a total quantity of 3805 acrefeet per year for the ground-water basin. This is a conservative figure and is greater than that which will likely be required annually during the construction period. The 3805 acrefeet are requested for only a one to two year construction period within a span of five years beginning in 1984 and ending in 1989. Construction of roads and a possible construction plant and camp are expected to commence about one year prior to shelter construction and will require less than one-fifth of the 3805 acre-feet figure. Ground water required for road construction is included in the 3805 acre-feet for shelter construction. Following construction, the operational ground-water use is expected to be less than 300 acre-feet per year. This reduced quantity of ground water will be needed for the life span of the system which will be approximately 20 years.

The ground water for construction will be used for road compaction, dust suppression, shelter construction, miscellaneous structures, and possibly construction plants and camps. Ground water for the operational phase will be used for maintenance and surveillance facilities personnel as well as other possible support systems.

The place of use of the ground-water, as indicated on the attached water rights survey map, covers the entire valley in anticipation of the probably broad areal extent of construction activities. It is possible that once the construction planning has been completed, a request may be filed to change the point of diversion on the attached application to a more strategic location, however, the above stated total quantity of ground water will remain the same.
